PREFACE	i
CONTENTS	iii
ORGANIZATION	iv
CURRENT STATUS OF NewSUBARU	
<i>NewSUBARU Storage Ring</i>	1
<i>Beamlines</i>	4
RESEARCH ACTIVITIES	
<i>Development of Tera-Hertz Light Sources at Compact Electron Linear Accelerator LEENA</i>	11
<i>Laser-plasma extreme ultraviolet source at 6.7nm using a rotating cryogenic Xe target</i>	13
<i>Effective collision cross section of xenon plasma debris in argon buffer gas</i>	15
<i>EUV interference Lithography for 1X nm</i>	17
<i>Imaging of EUV-mask patterns using coherent EUV scatterometry microscope based on coherent diffraction imaging</i>	22
<i>Critical Dimension Measurement of an Extreme-Ultraviolet Mask Utilizing Coherent Extreme-Ultraviolet Scatterometry</i>	
<i>Microscope at New SUBARU</i>	29
<i>Fabrication of Carbon X-ray Mask for High Aspect Ratio X-ray Diffraction Grating</i>	35
<i>Fabrication of High Aspect Ratio Au microstructures using Direct Electroforming on Si microstructures</i>	37
<i>SERS Active Three Dimensional Gold Nanostructure Fabrication for Optofluidic Device</i>	39
<i>Fabrication of Integrated Magneto Impedance Sensor for Medical Monitoring</i>	41
<i>Blood separation chip for automated biological analysis</i>	43
<i>Fabrication of fluorocarbon resin micro fluidic chip for processing of amino acid derivatization</i>	45
<i>Contamination-Free Internally-Triggered Automatic Flow Sequencing for Microfluidic</i>	47
<i>Reflected Surface Acoustic Wave Actuator Using Micro Groove</i>	49
<i>Damage Analysis of n-GaN Etched with He and N₂ Plasmas</i>	51
<i>Investigation of analyzing depth of N-K absorption spectra measured using TEY and TFY methods</i>	53
<i>Characterization of Electronic States of Ion-irradiated Multi-walled Carbon Nanotubes and Multi-layer Graphens using Soft</i>	
<i>X-ray Absorption Spectroscopy</i>	55
<i>Electronic structure of fluorinated diamond-like carbon thin films as a function of annealing temperature using photoelectron</i>	
<i>spectroscopy</i>	57
<i>K and L-edge Spectra of Several Sulfur Compounds</i>	59
<i>Crystallization Mechanism of a –SiGe Graded Films by Soft X-ray Irradiation</i>	61
<i>Thermal Durability of FIB-DLC Films Containing W</i>	62
<i>Comparison of Photon Flux of a BL06 with that of the Sun</i>	64
<i>Stability and alteration of amino acids and related compounds against soft X-rays in interplanetary space</i>	66
<i>Effective Modification in Silica-Based Films by Synchrotron Radiation</i>	67
<i>Release property of thin PDMS layer for UV nanoimprinting</i>	69
LIST OF PUBRICATIONS	
<i>Papers</i>	71
<i>International Meetings</i>	74
<i>Book</i>	84
<i>Awards</i>	84
ACADEMIC DEGREES	85
COVER PHOTOGRAPHS	87
EDITORIAL BOARD	88
